Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

CONTRAST

-
- ▲ Background and foreground colors do not have a sufficient contrast ratio.
-

These are opportunities to improve the legibility of your content.

NAMES AND LABELS

-
- ▲ Links do not have a discernible name
-

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

NAVIGATION

-
- ▲ Heading elements are not in a sequentially-descending order
-

These are opportunities to improve keyboard navigation in your application.

AUDIO AND VIDEO

-
- `<video>` elements contain a `<track>` element with `[kind="captions"]`
-

These are opportunities to provide alternative content for audio and video. This may improve the experience for users with hearing or vision impairments.

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

CONTENT BEST PRACTICES

▲ Document does not have a meta description

Format your HTML in a way that enables crawlers to better understand your app's content.
